

Category-Wise Vendor Depth Assessment

Strong Vendor Presence

Categories that typically require multiple active merchants and appear well-supported:

- Grocery / General Store
- Supermarket
- Medical & Pharmacy
- Beauty & Personal Care
- Clothing Store
- Footwear & Shoes

Vendor Depth: High

Moderate Vendor Presence

- Kitchen & Cookware
- Nutrition & Health
- Ayurvedic & Healthcare
- Bags & Luggage
- Artificial Jewellery
- Gift Shop

Vendor Depth: Medium

Weak Vendor Presence

- Saree Shop
- Watch & Clock
- Corporate Gifting
- Ice Cream Parlour
- Candies Store

- Chocolate Store

- Juice & Snacks

Vendor Depth: Low

Availability Issue

A significant observation is that some sections display:

"No products available in your area"

This suggests that:

- Categories exist.
- Merchant onboarding is incomplete.
- Local vendor coverage is limited in certain regions.

Vendor Count Maturity Score

Area| Score

Category Creation| 8/10

Vendor Availability| 5/10

Merchant Coverage| 5/10

Geographic Reach| 5/10

Marketplace Readiness| 6/10

Major Risks

1. Categories without active merchants.
2. Regional service gaps.
3. User drop-off due to unavailable products.
4. Over-expansion of categories before vendor acquisition.

Recommendations

Priority should be:

1. Increase active merchants in existing categories.
2. Improve area-wise vendor onboarding.
3. Ensure every category has sufficient local sellers before expansion.
4. Track vendor count per category as a core KPI.
5. Remove or hide inactive categories from unsupported locations.
